

## Redefining Aging: After Eternity, What?

"An aged man is but a paltry thing." William Butler Yates

"I wish to achieve immortality, not through my works, but through not dying." Woody Allen

"Enough, already." The Wandering Jew

When my friends and I were growing up, and were absolutely immortal, we were taught the prevalent view of aging, which may be summarized as thus: as you get older things begin to wear out and not work as well. Eventually, something wears out that you can't live without and then you

die, or if they are in stock, get a replacement part. It was the consensus of opinion that death was inevitable but a belief in reincarnation made it not very important. In fact, most people I know no longer speak of death but rather of transitioning, which suggests a favorable continuation of the soul. In any case there is little disagreement as to whether the body is or is not immortal... it isn't.

Now, I'm willing to stipulate that physical eternity is improbable; however, as a result of recent discoveries and revelations I expect certain revisions will be in order.

Let's consider the hereditary imbalance we address as frequency number 5248.

It was first found in a man complaining of progressive vision deterioration, which had reached the state of near blindness. When 5248 was detoxed from his eye, his vision improved and continues to do so. Did his eyes un-wear out?

Another man had a hearing loss that required him to wear two hearing aids (one in each ear). He has put them away and hasn't needed them in months (he had

actually become quite adept at lip reading and I tested his hearing improvement claims by not facing him and insulting him. To his credit, he heard every insult clearly.) And so on, and so on. Well over 90% of those on AIM had hereditary 5248. Wherever they had it, they exhibited classic signs of aging, up to and including dementia when it was in the brain.

That was the beginning of a wave of hereditary anti-aging frequencies. As each one was healed, symptoms that are normally associated with aging would diminish or disappear, including many problems that had been medically diagnosed as irreversible.

A number of AIM participants (including several facilitators) reported throwing away their reading glasses. I, on the other hand, still need mine. However, I am currently detoxing (healing) an hereditary imbalance revealed only about a week ago, and it is, among other places, in the orb of the cornea, retina and lens. Will this one be the Holy Grail, the fountain of youth? Should I alert Ponce de Leon? Stay tuned, because I am at my best when predicting the past.

Is anything truly irreversible? Where will it all end and when will it end? To what extent are we capable of interrupting the aging process? Will it reverse to the point of immaturity? Check here for more information as it occurs.

In May 2004, after several months of trying every prescription available to treat my diagnosis of chronic Hepatitis B, my doctor said he was going to have to discontinue the prescriptions for treatment because it wasn't helping and he just couldn't continue to justify the \$1,000 a month cost to the insurance company. He wanted to be clear that I understood I was terminal because of the chronic Hepatitis B. He said he thought I had about 5 years left to live, but that I should check back every 6 months as new medications are always coming out.

Somehow I came to order Kevin Trudeau's book *Natural Cures* in which he mentions the book Sanctuary. In January 2005 I enrolled in The AIM Program. Before starting The AIM Program, I was extremely fatigued and nauseated much of the time, but within 30 days of starting on AIM, these symptoms were gone and I felt better than I had in years!

In April 2005, my wife and I moved from Oregon to Tennessee, and I just never went back for my check-up every six months with my doctor in Oregon. After pressure from my family to see a doctor, I started inquiring about getting an appointment with a local doctor. I could find no doctor in town who would treat me, so I had to travel to Vanderbilt Medical Center in Nashville in order to be seen by a doctor.

After 2 appointments, several hundred dollars in blood work, a CT scan and a liver biopsy, the head of the liver transplant department at Vanderbilt told me "Gary, there just isn't anything wrong with you and you don't need to come back for any more tests unless you just want to."

I am so incredibly thankful for The AIM Program and the self-healing I have

experienced while on AIM! The digestive problem I have had all my life was gone within 30 days of starting The AIM Program. The eczema I have had for 35 years was gone in 7 weeks and has not come back no matter what I get my hands in. The pain in my foot that I had for 12 years and was taking 500 mg of Naproxin for twice a day was gone in 10 months (I quit the Naproxin when I started AIM).

After a year and a half on AIM, a wart disappeared—I had it since high school. And in order to read the words on my computer screen I had to wear reading glasses with my contacts. Now occasionally I put on a pair of reading glasses for some things, but I haven't needed to use the contacts for over a year and a half. I got my first pair of glasses when I was 7 years old and I'm 57 now. Thank you all!

Last week I went for my yearly eye exam. The eye doctor was amazed at my new prescription. He said, "This is the second year that your eyes have improved and that is very rare. In cases with your high prescription, it is rare for the eyes to improve and for two years in a row, that is very good."

I just smiled knowing it was my own self-healing on AIM. I have been on The AIM Program for over 5 years now and see my life changing for the better each year. My husband and I marvel at how great we feel, how much energy we have and how happy we are each day. We each have commented about how grateful we are for everything, and we notice how grateful we feel each day. Our lives are so blessed. No more drama in our lives. We are much more even in emotions and less negative things happen in our daily lives than before. We are attracting so much more good into our lives with The AIM Program!

I have been wearing hearing aids for the past 3 years since losing 50% of my hearing due to being a professional drummer.

When I discovered EMC<sup>2</sup> I started The AIM Program. Recently I was with friends and forgot to wear my hearing aids. Much to my surprise I was able to hear the entire conversation at the table.

I used to have to use my left ear when talking on the telephone and now I can use the right ear as well and hear conversations clearly, which I have not been able to do for at least 15 years.

It's great to be able to use either ear and hear so much better. I attribute the improvement in my hearing to my self-healing while on The AIM Program.
